One Database, Three Surfaces

ABOUT THE 2027 EDITION

The 2026 Directory proved MECSR can produce the region's most comprehensive guide to shopping centres, mixed-use destinations, retailers and service providers — a 332-page publication covering roughly 1,000 properties across 26 countries. The 2027 edition changes what the Directory *is*: from an annual publication assembled once a year into a continuously verified database that publishes three surfaces.

The live digital directory at directory.mecsr.org is regenerated continuously. Every listing shows a "last verified" date, and operator-confirmed records carry the MECSR Verified 2027 trust mark. Change logs show what happened to a property — a new anchor, a renovation, an ownership change — with source and date.

The print almanac — this book — does what print does best: prestige, permanence, and presence on every decision-maker's desk. It is curated, not exhaustive: country dashboards, rankings, expert intelligence and summary listings, with the exhaustive detail in the live directory.

The member intelligence layer — dashboards, benchmark reports and a grounded assistant answering only from verified fields with citations — is where member-submitted performance data becomes aggregated market intelligence that exists nowhere else.

Every page of this sample is generated from the master database. The listings, the country dashboards, the classification codes and the A–Z index are outputs of one governed dataset — which is why they always agree.

What's New in 2027

EIGHT CHANGES YOU WILL NOTICE

1 · A new classification standard. Every centre now carries a three-dimension code — Scale (S1–S6), Format (nine types) and Characteristics — replacing the 1970s-era ICSC labels that called a 95,800 sqm lifestyle centre and a 370,000 sqm mega destination the same thing.

2 · Print and live, one database. The book and the live directory at directory.mecsr.org are drawn from the same records, and corrections ship in the weekly digital refresh.

3 · Verified badges. Records confirmed by the operator display MECSR Verified 2027 — the one source class no scraper or AI can access at scale.

4 · Published methodology. The three-pass verification method, source tiers and confidence labels are printed in this book. Accuracy is a process claim, not a marketing claim.

5 · Industry intelligence, year-round. The MECSR Radar monitors members, malls, the pipeline and brands weekly. Its findings power the intelligence section of this edition — and the Directory Quarterly between editions.

6 · Data-visual country dashboards. Every country section opens with supply, scale-tier mix and pipeline built from the classification standard.

7 · Honest data. Figures we could not verify say so. Estimates carry a tilde. Provisional classifications are marked ● and queued for review.

8 · Bilingual signal. Arabic–English section openers serve the actual market and differentiate from every international competitor.

This is a structural sample of the 2027 edition. Editorial content is drafted from the MECSR Daily & Weekly Intelligence reports (June–August 2026) with sources named on every article. Mall photography is reused from the 2025–2026 image library.

Chairman's Message

كلمة رئيس مجلس الإدارة

[To be supplied by the office of the Chairman — approximately 450 words. The 2026 message structure is retained: a reflection on the year in Middle East retail, the association's role, and an introduction to what this edition delivers.]

Suggested themes for 2027: the shift from publication to platform; the new classification standard as regional infrastructure; the MECSR Verified programme and why operator-confirmed data matters in the AI era; Retail Congress MENA; membership growth across 24 countries.

"The 2027 edition is the year MECSR stops publishing a book about the industry and starts operating the industry's reference infrastructure."

The MECSR Classification Standard

WHY THE REGION NEEDED ITS OWN SYSTEM

The ICSC system has its roots in the 1970s, was designed for the North American retail market, and measures only approximate size. Under its framework, City Walk at 95,800 sqm and Dubai Mall at 370,000 sqm receive the same "Super-Regional" label — despite one being an open-air lifestyle centre and the other an enclosed mega retail and tourism destination. A luxury centre, an entertainment destination, a community mall and a heritage souq are classified identically, because the system cannot distinguish between them. It was never designed to.

The MECSR GCC Shopping Centre Classification Standard is calibrated against 624 shopping centres across the UAE, Saudi Arabia, Kuwait, Qatar, Bahrain and Oman. Every centre is classified across three dimensions: **Scale** — how big is it; **Format** — what does it primarily do; and **Characteristics** — eight structured, filterable attributes.

What counts as GLA. The Standard classifies on retail GLA only: leasable retail, F&B, entertainment and service space. It excludes common areas, car parks, service corridors, offices, hotel rooms and residential — critical in a region where a mixed-use development's built-up area can be two to five times its retail GLA. Where verified figures are unavailable, estimates are marked with a tilde (~), and properties whose published size is not explicitly retail GLA remain unclassified rather than mis-tiered.

"If any classification feels wrong for a centre you know, that is the feedback we need."

Source: MECSR Shopping Centre Classification Standard — Industry Briefing 2026.

Dimension 1 — Scale

SIX TIERS BY RETAIL GLA

S6	OVER 200,000 SQM	**Mega Centre** — Iconic destination of national or international significance — comprehensive retail, world-class entertainment, destination dining, often integrated hospitality. Annual footfall typically exceeds tens of millions.
S5	80,000 – 200,000 SQM	**Super Regional Centre** — Major destination with multiple large-format anchors, comprehensive entertainment, full-service dining and dedicated zones or wings. Draws from an entire metropolitan area or multiple cities.
S4	40,000 – 80,000 SQM	**Regional Centre** — Broad retail, leisure and services proposition drawing from multiple communities — anchored by department stores, large-format fashion or a hypermarket, with cinema and food court; a primary shopping destination for its catchment.
S3	15,000 – 40,000 SQM	**District Centre** — Multi-anchor centre serving a defined residential catchment across several neighbourhoods — fashion, electronics, homeware and a dining cluster beyond daily needs; may include a cinema or FEC.
S2	5,000 – 15,000 SQM	**Neighbourhood Centre** — Anchored by a supermarket, hypermarket or daily-needs retailer serving a neighbourhood catchment — grocery, pharmacy, salon, casual dining and essential services; repeat, habitual visits.
S1	UNDER 5,000 SQM	**Convenience Centre** — Small-scale managed retail serving an immediate catchment — a curated cluster of F&B, convenience or speciality shops, professionally managed with a defined tenant mix.

Dimension 2 — Format (I)

NINE TYPES · WHAT THE CENTRE PRIMARILY DOES

MC

Multi-Category

Broad tenant mix across fashion, electronics, homeware, services, dining and entertainment. The default classification when no single specialization defines the asset — it is not a lesser classification.

Assignment test: Does the centre have a dominant specialization that would qualify it for a specialist format? If not, it is Multi-Category.

LF

Lifestyle

Open-air streetscape or promenade format; high F&B concentration (typically 25%+), curated tenants, dwell time and social experience over transactional shopping.

Assignment test: If the centre were enclosed, would it lose its identity?

LX

Luxury

Luxury and ultra-luxury brands define the asset's identity (40%+ of tenants), with concierge, VIP lounges, personal shopping and valet.

Assignment test: If all luxury brands left, would the centre still have a viable identity? If yes, it is not LX.

OV

Outlet & Value

Outlet stores, off-price or wholesale/trade formats positioned below full-price retail — including the Dragon Mart direct-from-manufacturer model.

Assignment test: Would a full-price fashion brand feel out of place here?

ED

Entertainment Destination

Entertainment is the primary anchor and singular footfall driver; retail is complementary to the entertainment proposition.

Assignment test: Remove the entertainment anchor — does the centre lose its defining identity?

Dimension 2 — Format (II)

HERITAGE, THEMED, WATERFRONT, TRANSIT

HS

Heritage & Souq

Design references traditional souq or marketplace architecture — artisanal, cultural or heritage retail with pedestrian-scaled passages and courtyards.

Assignment test: Is the souq or heritage character the primary reason for the asset's distinctive positioning?

TM

Themed

A conceptual or historical design theme defines the asset's identity — not decorative, but how the centre is conceived, designed, marketed and experienced.

Assignment test: Would removing the themed elements fundamentally change how the centre is perceived?

WF

Waterfront

On a marina, beachfront, canal or island where the water feature defines character, tenant mix and experience — outdoor terraces, marina views, waterside promenades.

Assignment test: Would the same centre landlocked be a fundamentally different proposition?

TH

Transit Hub

Retail within airports, metro stations or terminals serving a captive, transit-driven customer base; leasing typically includes turnover rent tied to passenger volumes.

Assignment test: Would the retail exist without the transport function?

Format follows a hierarchy of specificity: a centre qualifying for any of the eight specialist formats receives that label; Multi-Category is the default for centres spanning multiple categories without one dominant specialization. A Multi-Category centre may still contain significant luxury, entertainment or F&B components — those are captured in Dimension 3.

Dimension 3 — Characteristics

EIGHT SEARCHABLE, FILTERABLE ATTRIBUTES

1 · Mixed-Use Integration

Standalone · Retail-Dominant · Integrated · Community-Embedded · Hospitality-Integrated · Retail-Minority

2 · Entertainment Level

None · Supplementary (cinema/FEC under 10% GLA) · Co-Anchor (~20% GLA) · Primary (the singular differentiator)

3 · F&B Intensity

Standard (<15% GLA) · Elevated (15–25%) · F&B-Led (25%+ — visitors come specifically to eat and socialise)

4 · Luxury Presence

Standard · Premium (dedicated luxury zone, 10–40%) · Primary (40%+ with concierge, VIP, valet services)

5 · Tourism Orientation

Local · Regional (meaningful weekend/holiday draw) · International (features on tourism itineraries)

6 · Sustainability Certification

Uncertified · LEED · BREEAM · Estidama · GSAS · Other (specific level recorded)

7 · Transit Connectivity

None · Metro-Adjacent (5–10 min walk) · Metro-Integrated (direct internal connection) · Airport

8 · Market Positioning

Premium · Mid-Market · Value-Driven

These attributes appear in the online directory as filterable fields — the difference between "show me malls in Riyadh" and "show me S4+ centres in Riyadh with metro integration, elevated F&B and a LEED certification." In this sample edition, Mixed-Use Integration is populated from published component data (marked ● provisional); the remaining attributes are being assigned in the 2027 classification review.

The Framework Applied

OLD LABEL VS NEW CLASSIFICATION — WORKED EXAMPLES

CENTRE	LOC	GLA (SQM)	OLD (ICSC)	NEW (MECSR)
Souq7	SA	420,000	Super-Regional	**S6 · Heritage & Souq (S6-HS)**
Dubai Mall	AE	370,000	Super-Regional	**S6 · Multi-Category (S6-MC)**
The Avenues	KW	360,000	Super-Regional	**S6 · Multi-Category (S6-MC)**
Mall of the Emirates	AE	248,000	Super-Regional	**S6 · Entertainment Destination (S6-ED)**
Place Vendome	QA	200,000	Super-Regional	**S6 · Luxury (S6-LX)**
Dragon Mart 1	AE	126,000	Super-Regional	**S5 · Outlet & Value (S5-OV)**
City Walk	AE	96,000	Super-Regional	**S5 · Lifestyle (S5-LF)**
The Galleria Al Maryah	AE	162,000	Super-Regional	**S5 · Luxury (S5-LX)**
Dubai Outlet Mall	AE	69,977	Super-Regional	**S4 · Outlet & Value (S4-OV)**
Bluewaters Wharf	AE	50,354	Regional	**S4 · Waterfront (S4-WF)**
Souk Madinat Jumeirah	AE	13,500	Community	**S3 · Heritage & Souq (S3-HS)**
Moda Mall	BH	16,200	Community	**S3 · Luxury (S3-LX)**
Marina Walk	AE	6,940	Neigh./Strip	**S2 · Waterfront (S2-WF)**
Eastern Mangroves	AE	4,074	Neigh./Strip	**S1 · Waterfront (S1-WF)**

Under the old system, seven of these fourteen centres shared one label. Under the MECSR Standard, each carries a code that says what it is — and the code is the same in this book, on the website, and in the data products.

Company Showcases

EIGHT DOUBLE-PAGE SPREADS · WHO IS IN, AND ON WHICH SPREAD

The showcase spreads are the sponsor's own space. MECSR supplies the grid, the typographic system and the imagery brief; the company supplies the copy and the artwork. Every spread in this edition belongs to a signed 2026 agreement.

What follows are structural mockups: the real company, the real position in the book, and the angle the spread is built around — drawn from what each business has publicly done in 2025 and 2026, so the client is briefed on their own material rather than an invention of ours.

Cenomi Centers DIAMOND	**20–21**
Unified Real Estate Development DIAMOND	**22–23**
Al Othaim Investment DIAMOND	**24–25**
Azad Properties DIAMOND	**26–27**
Knowledge Economic City PLATINUM	**28–29**
Red Sea Malls PLATINUM	**30–31**
Open slot — to be sold	**32–33**
Open slot — to be sold	**34–35**

Every showcase opens on a left-hand page and closes on the facing right-hand page. Page 1 of a bound book is a right-hand page, so printed spreads fall on even–odd pairs — 20|21, 22|23 and so on. A double-page advertisement placed on an odd start would be split across the gutter in print.

Diamond Sponsor · COMPANY SHOWCASE

Cenomi Centers

20 centres · ~1.2m sqm GLA · targeting 1.9m by 2029

The Westfield decade — importing a global operating standard into the Kingdom

CLIENT-SUPPLIED COPY — 450–600 WORDS

IMAGERY BRIEF

Westfield Riyadh atrium; Mall of Arabia Jeddah

Exclusive URW licence (Dec 2024). Westfield Jeddah 104k sqm has its occupancy certificate; Westfield Riyadh 220k sqm, ~94% pre-leased, opens Q4 2026.

Alison Rehill-Erguven, CEO

Diamond Sponsor · COMPANY SHOWCASE

Unified Real Estate Development

Expert Views

NINE COMMISSIONED SPREADS

Expert Views are bylined articles by the people running the region's centres and the platforms behind them. Each is commissioned against a subject the author has actually worked on, and each carries a named author and job title.

The titles shown here are proposed, not agreed. Nothing on these pages is a quotation: every angle is derived from a public action or a published position, and the final copy is written by the author.

Country Profiles

MACRO AND RETAIL INDICATORS

Country profiles carry the macro and retail indicators behind each market: population, GDP per capita, retail sales, organised-retail share, and the directory's own stock figures — centres listed, GLA published, and GLA per thousand inhabitants.

Country Profiles Contents

TWELVE MARKETS ACROSS FOUR SPREADS

Bahrain · Egypt · Georgia **58–59**

Kazakhstan · Kenya · Kuwait **60–61**

Nigeria · Oman · Pakistan **62–63**

Tunisia · Türkiye · UAE **64–65**

Bahrain · Egypt · Georgia

COUNTRY PROFILE

Macro and retail indicators sourced from GMRC and refreshed annually. Directory stock figures are computed from the 1,377-property dataset at press date.

Must-Visit Destinations

وجهات لا بد من زيارتها

The centres that define the region — chosen on scale, format and the thing each one does better than anywhere else. Every destination links to its live, verified record.

SEVEN DESTINATIONS

UAE · MUST VISIT

Dubai Festival Plaza - Shopping Center

Dubai · S6-MC · GLA 230,000 sqm · opened 2019

SAUDI ARABIA · MUST VISIT

Jeddah Promenade

Jeddah · S6-MC · GLA 410,000 sqm · opened 2021

KUWAIT · MUST VISIT

Beyout Plus Project

Jahra · S6-MC · GLA 120,000 sqm · opened 2027 Q1

BAHRAIN · MUST VISIT

City Centre Bahrain

Manama · S5-MC · GLA 155,000 sqm · opened 2008

EGYPT · MUST VISIT

Cairo Festival City Mall

Cairo · S5-MC · GLA 158,400 sqm · opened 2013

TURKIYE · MUST VISIT

Kumsmall AVM

Kayseri · S5-MC · GLA 180,000 sqm · opened 2020

JORDAN · MUST VISIT

Golden Gate Mall

Amman · S6-MU · GLA 200,000 sqm · opened 2021

How to Read the Listings

THE ANATOMY OF A 2027 ENTRY

Every centre in this directory carries the same four things: a classification under the MECSR Standard, a verified retail GLA where one exists, the year it opened, and a contact route to its owner or operator.

Every centre in every country is presented on the same card, nine to a page — the same fields and the same classification block whether the centre is an 8,000 sqm community mall or a 370,000 sqm super-regional. No centre is demoted to a table row.

Corrections: report an error at directory.mecsr.org/corrections. Corrections ship in the weekly digital refresh, with a change log showing what changed and why.

Data Notes & Status Markers

WHAT THE FIGURES MEAN — AND WHAT THEY DON'T

Retail GLA means leasable retail, F&B, entertainment and service space. It excludes common areas, car parks, service corridors and — in mixed-use schemes — the office, residential and hotel components. Where a published figure is built-up area rather than retail GLA, the record is marked unverified rather than converted.

In this region a mixed-use scheme's built-up area can be two to five times its retail GLA. Converting one into the other would put centres in the wrong scale band, so the Directory never does it: a figure is either verified retail GLA, or it says what it is.

SCALE BAND	RETAIL GLA
S1	Under 5,000 sqm
S2	5,000 – 15,000 sqm
S3	15,000 – 40,000 sqm
S4	40,000 – 80,000 sqm
S5	80,000 – 200,000 sqm
S6	Over 200,000 sqm

MARKER	WHAT IT MEANS
~	Estimate — the figure is derived, not published by the operator.
●	Provisional classification, queued for the human classification review.
Not Public	Researched through every pass; the operator does not disclose it.
Unverified	A figure exists but has not been confirmed against an operator source.
Conflicting	Two Tier A sources disagree; both values are held with their URLs.
N/A	The field does not apply to this property.

Corrections: report an error at directory.mecsr.org/corrections. Corrections ship in the weekly digital refresh, with a change log showing what changed and why.

Retail Brands

العلامات التجارية

The 2027 retail brands section is generated from the Mall_Tenants dataset — every brand row linked to the malls it trades in, powering footprint views like "this brand operates in 47 malls across 9 countries." This sample shows the section's structure using the MECSR canonical category taxonomy.

Retail Brands 2027

HOW THIS SECTION WORKS

In the 2027 database, every tenant is one row: brand, mall, category, anchor status, source URL and verification date. Deduplicate the brand column and you have this section — a brands directory in which every entry is derived from operator-published tenant lists, never from scraping or third-party aggregators.

Each brand entry in the full edition carries: canonical name and parent company; sector and subcategory; country of origin; MECSR member status; and its directory footprint — the number of listed malls and countries in which it appears, computed live from the tenant sheet.

Brand footprint pages are among the directory's most defensible content: impossible to compile casually, continuously verified, and precisely what retailers, franchise groups and leasing teams need when planning market entry. The pages that follow show the category structure with example brands drawn from the MECSR canonical taxonomy.

SAMPLE NOTE — brand footprint counts appear in this layout as ▢▢ placeholders. They are computed from the Mall_Tenants sheet at production and are not estimated in this sample.

Brand Footprints

THE PAGE EVERY LEASING TEAM READS FIRST

The footprint page inverts the directory: instead of "which tenants are in this mall," it answers "which malls carry this brand" — by country, by tier, by format. A retailer weighing a Riyadh entry sees at a glance where its competitors sit; a landlord pitching a vacancy sees which brands are expanding into its tier.

Because every footprint row traces to an operator-published tenant list with a verification date, the counts are citable. That is the difference between this section and every scraped brand database: when the number says 47 malls, there are 47 source URLs behind it.

Anchors & Entertainment Operators

THE FOOTFALL ENGINES

Anchor tenants get dedicated treatment in 2027: department stores, hypermarkets, cinemas and family entertainment centres are the tenants malls are organised around, and the Mall_Tenants schema flags each with an anchor type. The full edition lists every anchor operator with its directory-wide anchor count.

Cinema operators (VOX, Reel, AMC, Muvi, Cinescape and peers), FEC brands (Magic Planet, KidZania, Fabyland, Adventure HQ, Sparky's) and the region's department-store groups anchor this sub-section — the operators whose expansion decisions move a property's classification from Supplementary to Co-Anchor entertainment.

Anchor operators table — populated from Is_Anchor = Yes rows at production

Market Entries 2026–27

NEW TO THE REGION, TRACKED BY THE RADAR

The Radar's brands watch monitors market-entry signals across all 24 countries. Recent verified examples from the intelligence reports: On Running's first UAE store at Mall of the Emirates (July 2026); carpo's first Qatar store at Villaggio's Vio Dome (11 June 2026); the region's first side-by-side Crate & Barrel + CB2 experience at Dubai Hills Mall (June 2026); and HyperMax, Majid Al Futtaim's new grocery brand, debuting in Bahrain.

In the full edition this page becomes a season-by-season entry log — brand, first location, mall, date, source — one more dataset nobody else maintains for these markets.

Sources: Zawya (Jun 2026); On official press page (Jul 2026); AGBI (2026); MECSR Daily & Weekly Intelligence, June–August 2026.

Season entry log table — brand · first location · mall · date · source

Service Providers

مزوّدو الخدمات

The companies that design, build, fit out, secure, clean, market and operate the region's retail places. In 2027 each category can be owned by a single exclusive Category Sponsor across print and digital.

Service Providers 2027

HOW THIS SECTION WORKS

Eighteen categories cover the supply chain of the region's retail real estate. In the full edition each category page lists verified providers — name, specialisation, markets served, member status and contact — with MECSR members badged and enhanced listings carrying project galleries and case references.

Categories are exclusive sponsorship inventory: one sponsor per category across the print edition, the digital directory and the Directory Quarterly. The category sponsor's brand sits on this page's header strip for the full cycle — visibility, never data placement.

SAMPLE NOTE — provider listings are populated from the validated service-provider dataset at production. This sample shows category structure only.

Methodology

HOW THIS DIRECTORY IS RESEARCHED

Three-pass verification

Pass 1 — Discovery establishes existence, identity and location per country, deduplicates and filters non-malls. **Pass 2 — Operator Verification** takes core data from the operator's own channels, recording the exact source URL per field. **Pass 3 — Cross-reference** verifies against independent Tier A/B sources; conflicts are recorded, never resolved autonomously.

Source tiers

Tier A — operator and developer official channels; REIT filings and annual reports; government statistics and tourism authorities; certification registries; transit authorities; accredited trade press. **Tier B** — established regional media with editorial standards, used for openings, closures and announcements, corroborated for high confidence. **Tier C** — discovery only. **Tier D** — blacklisted: scrapers, lead databases, machine-generated sites; never used for any purpose.

Anti-hallucination rules

No field is filled from general knowledge; no unit conversion during research; no estimating GLA from imagery; no invented contacts; no autonomous choices between conflicting sources; no classification during research. Every value traces to a source URL or carries an explicit status marker.

Confidence & Status Labels

READING THE DATA HONESTLY

Confidence tiers

High — two or more Tier A sources agree, or one uncontradicted Tier A source. **Medium** — one Tier A source uncorroborated, or two Tier B sources. **Low** — a single Tier B source, flagged for verification. **Unverified** — no credible source found; the field says so.

Status markers

Not Public — researched through all passes; the operator has not published it. **N/A** — does not apply. **Unverified** — could not be located. **Conflicting** — authoritative sources disagree; both values held with URLs. A blank cell never appears in a completed record.

What counts as retail GLA

Retail GLA means leasable retail, F&B, entertainment and service space. It excludes common areas, car parks, service corridors and — in mixed-use schemes — the office, residential and hotel components. Where a published figure is built-up area rather than retail GLA, the record is marked unverified rather than converted: in this region a mixed-use scheme's built-up area can be two to five times its retail GLA, and converting one into the other would put centres in the wrong scale band.

Mall_ID

Every property carries a permanent identifier — COUNTRY-CITY-NNN, e.g. UAE-DXB-001 — that survives renames, refurbishments and ownership changes. Cite it in reports, filings and press: it is designed to be the region's reference identifier.

Provisional classifications in this edition

Values marked ● were auto-assigned for the 2027 cycle — scale tiers from published GLA banding; formats from the Standard's worked examples or conservative keyword rules, defaulting to Multi-Category — and are queued for the human classification review. Properties without verified retail GLA remain unclassified rather than mis-tiered.

Advertise With MECSR

THE 2027 INVENTORY

Title / Cover Partner (1)

Cover branding, gatefold, opening spread, congress co-branding. Flagship — invite-only.

Country Section Sponsors (24, exclusive)

“UAE section presented by …” — country dashboard co-brand and digital country-page takeover. Developers, banks, promotion bodies.

Category Sponsors (exclusive)

Own Fit-Out, PropTech, Security or F&B across the print and digital service-provider sections.

Showcase Spreads

Company showcase pages bundled with an enhanced digital listing and newsletter feature.

Enhanced Listings (volume)

Upgraded directory entry: gallery, virtual tour, leasing CTA, featured placement, Verified fast-track. Every listed property is a prospect.

Digital & Quarterly

Directory website placements, Directory Quarterly sponsorship, pipeline report sponsor, newsletter takeovers — year-round.

Rule of separation: sponsors buy visibility. They never buy data placement, rankings or MECSR Verified status — that separation is what keeps both products sellable.

The Digital Directory

ONE DATABASE, IN PRINT AND LIVE

Everything in this book is the curated surface of a live database. The digital directory carries the exhaustive detail: full listings for all 1,377 properties, tenant lists and brand footprints, the pipeline tracker, change logs, and the confidence label on every key figure.

Members additionally access benchmark dashboards, the full weekly Radar digest and — as the Member Data Exchange grows — aggregated occupancy, footfall and sales-productivity benchmarks that exist nowhere else.

Every centre in this edition can be found in the live directory by name, where its record keeps moving after the book is printed. The print book is the top of the digital funnel.

THE PEOPLE AND THE PROCESS

The MECSR Directory 2027 is researched, verified and produced by the MECSR research and publications team, with the association's members — the operators, developers, retailers and service providers of 24 countries — as its collection network.

Research method: MECSR Source Policy v1.0; Malls Schema (95 fields); Mall_Tenants Schema; three-pass verification. **Monitoring:** MECSR Radar toolkit — members, malls, pipeline and brands watches, weekly digests, human review. **Classification:** MECSR GCC Shopping Centre Classification Standard, calibrated against 624 centres.

Editorial in this sample: drafted from MECSR Daily & Weekly Intelligence reports (June–August 2026) with sources and dates on every article. **Photography:** MECSR 2025–2026 Directory image library. **Data:** consolidated 2026 published baseline, provisionally reclassified for 2027.

Corrections and updates: directory.mecsr.org/corrections. Membership and advertising: mecsr.org.

SAMPLE EDITION — this document demonstrates the 2027 structure, pagination and design language. Production pages are generated from the master database at press date.

MECSR Member Listings

SECTION NOTE

Pages 298–313 of this sample reproduce the actual 2026 member listing pages, spliced from the 2026 print file — demonstrating how existing sections carry into the 2027 edition unchanged in structure while the surrounding book is regenerated from the database. In production, member listings are refreshed from the membership CRM at press date, with MECSR Verified badges for members who have confirmed their records.
